

WEBINAR: THE ROLE OF ACCREDITATION IN ADDRESSING DEMANDS FOR DIVERSITY, EQUITY, AND INCLUSION (DEI)

A 2021 survey of college students reported that at least 70% of students are motivated by justice, equity, diversity, and inclusion (JEDI). Opportunities to engage in crucial conversations and activism with faculty, staff, and student peers may influence a student's career decision and their selection of a higher education institution. This webinar will discuss recent publications and discussions debating the role of accreditation in addressing the expectation of JEDI infusion into healthcare training. Other topics will include best practices in terminology, community engagement, and implementation science related to justice, equity, inclusion, and diversity.
